Where innovation and leadership meet to set the strategic agenda of tomorrow's healthcare

Welcome to the Future Health Summit, the unprecedented convergence of innovation and leadership aimed at defining the strategic direction of tomorrow's healthcare landscape. This summit is more than a mere meeting of minds; it is where transformative ideas take center stage and groundbreaking initiatives gain momentum, reshaping the health sector as we know it.

Why reverse aging & longevity?

Futurist Dr. Jose Cordeiro, a guest speaker at the Dubai Future Forum said, “anyone who is still alive by the year 2030 has a good chance of living forever.”

Dr. Jose’s words could soon become a reality with people now living an average of more than 70 years, which has been attributed to medical advancements, improved diets, and better awareness of harmful habits. Recent years have witnessed a burgeoning fascination with the prospect of leveraging cutting-edge research to slow or even reverse the aging process, ultimately aiming to enhance well-being and extend human longevity.

In the UAE and the Gulf, there is a revolutionary vision to increase the average lifespan of the population and the future health summit will enable the experts in the field to gather under one roof to understand the latest developments, technologies and key players that are invested in bringing this vision to reality.

Agenda

10:00	Guests arrival and welcome

CONFIRMED SPEAKER

Shaista Asif

Shaista Asif, Group CEO spearheaded several AI-driven initiatives, in line with PureHealth's vision, including the launch of Pura, the region's first AI-backed healthcare companion app, which is helping people live healthier, longer lives; as well as the launch of PureNet, a dedicated healthcare cloud providing digital health as a service platform.

As a steadfast supporter of women, Shaista Asif organised and hosted over 500 attendees, female leaders, and senior government officials at the Remarkable Emirati Women summit, under the patronage of Her Highness Sheikha Fatima Bint Mubarak, the Mother of the Nation, and played a key role in the launch of the Emirati Women Chapter, a mentorship initiative dedicated to empowering and inspiring Emirati women.

CONFIRMED SPEAKER

Dr. Michael Ringel

Dr. Michael Ringel has been at BCG 25 years and is currently Managing Director and Senior Partner. He is on the Board of AFAR, one of the oldest organizations supporting healthy aging, an advisor to Life Biosciences, a premier longevity biotech, and an active advocate for the coming boom in longevity investment. Dr. Ringel holds a B.A. summa cum laude in biology from Princeton, a Ph.D. in biology from Imperial College, and a J.D. cum laude from Harvard Law School.

CONFIRMED SPEAKER

Dr. Mehmood Khan

CEO, Hevolution Foundation - The Chief Executive Officer of Hevolution Foundation, a first of its kind non-profit organization that funds research through grants and provides investments in biotech to incentivize healthspan science across disciplines and borders for the benefit of all. Established by a Saudi Royal Decree with its headquarters in Riyadh with additional international hubs to support the expansion and execute the global mission. Its vision is to expand healthy human lifespan for the benefit of all humanity.

CONFIRMED SPEAKER

Sadia Khuram

Sadia Khuram is the Chief Strategy Officer of the Pure Health Group. Sadia is responsible for the development and implementation of Pure Health's corporate strategy, business development, and partnerships. As the Chief Strategy Officer, Sadia also drives Research & Innovation for the Group.

Before joining Pure Health, Sadia has worked extensively in senior management and board positions in the telecom, mobility and energy sectors. Sadia is passionate about helping businesses and organizations, especially in the healthcare sector, leverage the opportunities presented by technology to create, capture and deliver value for the patients & society in a digital economy. She actively engages with the academic and start up communities to get inspired and to support in building the next generation of disruptors, innovators and leaders.

Sadia Khuram is a Sloan Fellow and has an MBA in Innovation and Global Leadership from the MIT Sloan School of Management. She has won numerous awards and accolades in her academic and professional career.
